Iowa City, IA 52246 

Career Objective

Since I start coding, my most honed skills are making requests to the server with all its needed middleware functions, and create data-driven user interface apps.

I continue to improve myself on a daily basis in other aspects of programming, such as algorithms, recursion, etc.

I strive to reach a high level in programming to secure a good job and proceed to grow at a slower pace.

My best qualities are punctuality, goal-oriented. I enjoy meeting peers and developers to bond and exchange knowledge and life lessons.

Experience

SECURITY OFFICER

Feb 2022 - Present

SECURITAS — Cedar Rapids, IA
